

# Skill Splash – Account Deletion Information

If you would like to delete your Skill Splash account and associated data, you have two options:

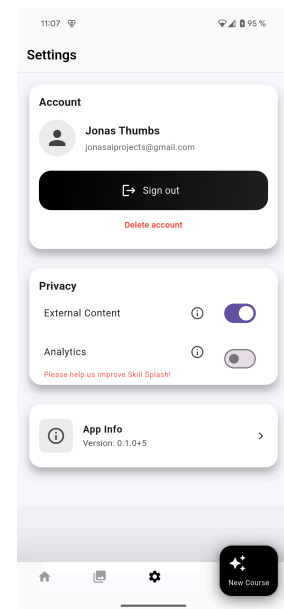

## 1. Delete your account in the app

You can delete your account directly in the SkillSplash app under:  
[Settings](#) > [Account](#) > [Delete Account](#)

This action will:

- Permanently delete your user profile
- Delete all courses you have published
- Erase any associated personal data (e.g., name, email)

This process is **immediate and irreversible**.

---

## 2. Request deletion by email

If you no longer have access to the app, send an email to [skillsplash.app@gmail.com](mailto:skillsplash.app@gmail.com) with the subject "**Delete Account**" and the email address used to register.

---

### Data retention:

Your data will usually be deleted **immediately**. However, technical backups may keep data temporarily (for up to 30 days) before complete removal.
